**What is SHaRP?**

The Salmon Habitat Restoration Program (SHaRP) is an environmental initiative created by the City of Surrey to protect and improve stream habitats as the city grows and develops.

**SHaRP’s Legacy**

- 9,000 native plants planted
- 230,000 plants and trees revegetated
- 90 new jobs created
- 630 students hired
- 100 new citizens
- 15,500 community members engaged
- 20,000 new volunteers
- 475,000 trees planted
- 75,500 trees planted on private property
- 2,275 trees planted on private property

**Cougar Creek Site**

Increasing the amount of native greenery at urban watershed sites helps improve the quality of storm water, provides shade for wildlife, and encourages local residents to protect and enjoy the area.

**Thank You!**

Your donation is supporting salmon habitat restoration and environmental jobs for youth!
